PROFILE SUMMARY

Alumni of STMIK-AUB Surakarta majoring in System Information. An individual who has a strong interest in technology, especially programming. Specializing in software and application development with extensive industry experience. Proficient in PHP, JavaScript, TypeScript, and Java for Web Development. With adept utilization of various development tools and frameworks. Experienced in crafting modern user interfaces, alongside expertise in developing back-end systems including API creation, database management, and server performance optimization. Highly curious and driven to continuously learn and develop professionally.

SKILL AND COMPETENCIES

Experienced in designing efficient and scalable software architectures, utilizing various development tools and frameworks:

HTML, CSS, PHP, JavaScript, Node.js, TypeScript, Java, MySQL, PostgreSQL, SQL Server, MongoDB

KEY PROJECTS & EXPERIENCE

Pusdatin Aset BPAD DKI Jakarta

Full Stack Developer

- Utilized Vue.js and Tailwind CSS to design and develop e-reklame CMS, e-reklame Mitra, LBMD, and MPSBMD applications.
- Implemented APIs using Postman for testing and documentation, and utilized Docker containers to generate public URLs for API integration testing.
- Collaborated closely with cross-functional teams to develop and deploy application versions that streamline workflow and user operations.

RSUD Jati Padang

Developer

- Utilized PHP and Bootstrap to design and develop employee and staffing management modules.
- Implemented and structured MySQL database schemas for reliable data storage and high-performance querying.
- Developed REST APIs using Postman for testing and documentation, utilizing Docker for API testing environments.
- Collaborated closely with system team to develop and maintain healthcare service features.

RS Jantung Jakarta

Developer

- Utilized Laravel and Bootstrap framework to design and develop the main hospital portal and administrative web application.
- Implemented MySQL database architecture for data persistence and patient management.
- Implemented custom WhatsApp API integration for automated appointment reminders and notification delivery.
- Implemented RESTful APIs for mobile application doctor appointment scheduling.
- Collaborated closely with team to simplify user processes for searching medical info and doctor consultation appointments.

QDC Technologies

Developer

- Utilized Laravel and Bootstrap to design and develop enterprise web platforms.
- Implemented MySQL database solutions for transaction and enterprise data management.
- Implemented scalable API services for ERP enterprise system integration.
- Collaborated closely with core engineering team to deliver robust software solutions.
